PEPTI-NANO NECK & DÉCOLLETÉ MASK

DESCRIPTION

The Viktoria DéAnn Pepti-Nano Neck & Décolleté Mask is a peptide-powered bio-cellulose delivery system created to visibly firm, smooth, brighten, and deeply hydrate the delicate skin of the neck and chest. Applied as the final step over customized Restore Peptides, its individually grown nanofibril matrix conforms closely to every contour, creating cooling, prolonged contact that enhances the penetration and absorption of the layered peptide serums while delivering the mask's own actives. The result is plumper, smoother, brighter, more supple-looking skin, with progressive improvements in firmness, tone, and texture with continued professional use.

TREATMENT STEP

Restore

TEXTURE

Bio-Cellulose Sheet Mask

PEPTIDE TYPE

Signaling Peptide
(Palmitoyl Tripeptide-38)

LAYER LEVEL

Final delivery step, applied over layered Restore Peptides

SKIN TYPE

All Skin Types, especially dry, dehydrated & photoaged

KEY ACTIVES

Palmitoyl Tripeptide-38, Paeonia Lactiflora Root Vesicles (Peony Exosomes), Phellinus Linteus Extract (Myco-Active), Sugar Derived Hydration Complex

FUNCTION

- Increases Restore Peptide penetration
- Adds matrix peptide signaling
- Visibly firms, smooths and plumps
- Brightens and evens skin tone
- Defends against visible photoaging
- Deeply hydrates, reduces TEWL
- Supports barrier and skin recovery

TARGETED SKIN CONCERNS:

- Horizontal neck lines, creasing
- Fine lines and dynamic wrinkles
- Loss of firmness and elasticity
- Thin-looking, poor suppleness
- Loss of structure and laxity
- Crepey and dry texture
- Dry and dehydrated
- Dull and lackluster
- Hyperpigmentation
- Dark spots and age spots
- Visible photoaging and sunspots
- Visible redness and PIE
- Oxidative aging, skin stress
- Loss of clarity and tone
- Uneven tone and texture
- Mottled skin or discoloration

THE SCIENCE:

Nano fibril delivery system: The ultra fine fibers, just 2-50 nanometers wide, create a dense mesh that intimately conforms to every contour of the skin. Acting like countless tiny needles, these nano fibrils settle into fine lines, grooves, and wrinkles to deliver active ingredients directly to targeted areas. This precision allows for enhanced absorption and effective delivery, ensuring that actives reach the skin cells where they can have the greatest impact. By mimicking nano needling, the mask maximizes ingredient penetration without mechanical irritation, making it ideal for advanced professional treatments.

Electrical gradient infusion and targeted actives: As the bio-cellulose grows, it naturally forms a gradient from the thicker layer near the bacterial source to the thinner outer surface, generating a subtle electrical field that encourages actives to move deeper into the skin. This makes the mask the optimal delivery system for the Restore Peptides layered beneath it: peptides provide the signal, and the bio-cellulose creates the delivery environment. The mask then delivers its own targeted actives. Palmitoyl Tripeptide-38, an additional signal peptide, supports Collagen I, III, and IV, fibronectin, laminin, and hyaluronic acid. Peony Root Vesicles, **plant-derived exosomes**, help brighten and address pigmentation, redness, and oxidative aging. Phellinus Linteus **myco-active technology** provides antioxidant defense, barrier support, and skin recovery, while the **Sugar Derived Hydration Complex** binds water, reduces TEWL, and visibly plumps crepey texture.

PROFESSIONAL USAGE:

Use Mask after Cleanse Phase and application of recommended Restore Peptides, layered by molecular weight on the neck and décolleté. The mask is made up of three layers and is one piece. Unfold mask and remove from sleeve. Remove the protective plastic layer of mask and discard. Carefully apply the nanocellulose layer (non-fabric layer) to the neck and décolleté. Press firmly onto the skin and carefully remove the top fabric layer. Adjust for neck and chest contour and remove the treatment mask after 10-30 minutes. Follow with Protect Phase.

HOME USAGE:

Use Mask after cleansing and application of recommended Restore Peptides, layered by molecular weight on the neck and décolleté. The mask is made up of three layers and is one piece. Unfold mask and remove from sleeve. Remove the protective plastic layer of mask and discard. Carefully apply the nanocellulose layer (non-fabric layer) to the neck and décolleté. Press firmly onto the skin and carefully remove the top fabric layer. Adjust for neck and chest contour and remove the treatment mask after 10-30 minutes. Follow with Protect Phase.

KEY ACTIVES:

Palmitoyl Tripeptide-38 - a biomimetic signal peptide that communicates with skin cells involved in extracellular-matrix renewal. It supports six key structural components of the skin matrix and dermal-epidermal junction: Collagen I, III, and IV, fibronectin, laminin, and hyaluronic acid. On the neck and décolleté, it helps visibly improve firmness, elasticity, and suppleness while reducing the appearance of horizontal neck lines, creasing, fine lines, and crepey texture.

Paeonia Lactiflora Root Vesicles (Peony Root Exosomes) - plant-derived exosomes: natural lipid-bilayer nanovesicles from the root of the white peony, moving beyond a traditional botanical extract. Peony-derived bioactives have been studied in pathways involving melanogenesis, tyrosinase activity, oxidative stress, inflammatory signaling, UV-induced reactive oxygen species, matrix degradation, and glycation. Helps improve the appearance of hyperpigmentation, dark and age spots, visible redness, and loss of clarity for brighter, more resilient-looking skin.

Phellinus Linteus Extract (Myco-Active Technology) - a bioactive mushroom containing naturally occurring polyphenols, polysaccharides, and beta-glucan-related compounds associated with antioxidant and soothing activity. This multi-functional myco-active helps defend against oxidative stress, supports healthy barrier function, calms visible inflammation and redness, and promotes the skin's natural recovery process, supporting calmer, brighter, more even-looking skin on the sun-exposed neck and chest.

Sugar Derived Hydration Complex - a three-component, sugar-derived hydration system that addresses dryness from multiple directions: binding water within the outer skin layers, reducing transepidermal water loss (TEWL) so skin stays hydrated longer, and supporting the skin's natural moisture barrier. Visibly plumps, smooths, and softens dry, creased, and crepey-looking skin, reinforced by Sodium Hyaluronate, Betaine, Panthenol, Glycerin, and Glycosyl Trehalose.

INGREDIENTS:

Water, Butylene Glycol, Betaine, Panthenol, Glycosyl Trehalose, 1,2-Hexanediol, Hydroxyacetophenone, Hydrogenated Starch Hydrolysate, Ammonium Acryloyldimethyltaurate/VP Copolymer, Xylitylglucoside, Anhydroxylitol, Glycerin, Sclerotium Gum, Caesalpinia Spinosa Gum, Xylitol, Sodium Hyaluronate, Phellinus Linteus Extract, Glucose, Maltodextrin, Hydrolyzed Caesalpinia Spinosa Gum, Wine, Hydroxypropyl Cyclodextrin, Sodium Benzoate, Potassium Sorbate, Paeonia Lactiflora Root Vesicles, Palmitoyl Tripeptide-38

CAUTIONS:

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. This product could be a choking hazard. Keep out of reach of children.
