

COLLAGEN GEL

DESCRIPTION

Viktorija DeAnn Collagen Gel is a lightweight, fast absorbing moisturizer designed to deliver superior hydration while supporting the skin's natural structure and resilience. This refreshing gel helps visibly improve the appearance of large pores, fine lines, and wrinkles, leaving the skin smoother, firmer, and more refined. Ideal for all skin types, including sensitive and post procedure skin. Collagen Gel deeply nourishes without clogging pores or feeling heavy.

TREATMENT STEP

 Protect

TEXTURE

Lightweight gel

PEPTIDE TYPE

N/A

LAYER LEVEL

N/A

SKIN TYPE

All Skin Types, especially sensitive

KEY ACTIVES

Soluble Collagen, Cocoate, Oragnic Aloe

FUNCTION

- Supports the resistance and elasticity of the skin
- Non-irritating, a natural humectant
- Soothes, strengthens and calms the skin
- Improves support, suppleness and resiliency to skin
- May be used to increase conductivity during modalities and treatments

TARGETED SKIN CONCERNS:

- Mature & aging skin
- Skin prone to breakouts
- Dry & dehydrated skin
- Loose skin and increased skin laxity
- Compromised or sensitive skin
- Post procedure repair & hydration

THE SCIENCE:

Soluble collagen is a refined, bioavailable form of collagen that has been processed into smaller, water-dispersible molecules, allowing it to interact more effectively with the skin's surface and upper layers. Built from the same amino acid building blocks as peptides, soluble collagen mimics the skin's natural communication processes, helping maintain balance within the extracellular matrix. These collagen fragments are hydrolyzed into smaller peptides capable of penetrating the stratum corneum, where they provide biochemical cues that support fibroblast activity and matrix renewal. This interaction helps strengthen structural integrity, enhance elasticity, and improve water retention within the collagen-rich network of the skin.

Aloe vera complements these effects by supplying polysaccharides and amino acids that help calm irritation and support hydration balance at the epidermal level. In combination with antioxidant components that help defend against oxidative degradation of collagen fibers, this formulation fosters an environment for renewal, resilience, and long-term skin vitality.

PROFESSIONAL USAGE:

Apply 2-3 pumps to face, neck and décolleté as needed following the Cleanse and Restore phases of treatment.

HOME USAGE:

Apply 2-3 pumps to face, neck, and décolleté (morning and evening) after Cleanse and Restore steps.

KEY ACTIVES:

Soluble Collagen - a skin conditioning ingredient that helps support the skin's natural structure and improve its overall texture. Soluble Collagen is a refined form of collagen composed of lower molecular weight peptide fragments designed for enhanced affinity with the skin. These fragments help condition and hydrate the skin, promoting a smoother, more supple appearance. By supporting moisture retention and contributing to the skin's sense of firmness and elasticity, soluble collagen helps maintain a healthier, more resilient complexion.

Glyceryl Cocoate (Cocoate) - a gentle, plant derived emollient that helps soften and smooth the skin while enhancing moisture retention. It provides a silky texture to the formula and helps support the skin's natural barrier by locking in hydration. This ingredient also contributes to a soothing, comfortable feel, making the skin appear more nourished and balanced.

Aloe Barbadensis Leaf Juice (Organic) - a soothing, plant based ingredient known for its ability to comfort and hydrate the skin. It helps replenish moisture, leaving the skin feeling soft, calm, and refreshed. Aloe also increases the availability of oxygen to the skin, which enhances hydration and promotes a healthier, more radiant appearance. Additionally, it supports the skin's natural balance and improves the overall look of smoothness and clarity, making it ideal for sensitive or stressed skin.

INGREDIENTS:

Aqua (Water), Soluble Collagen, (Organic) Aloe Barbadensis Leaf Juice, PEG-7 Glyceryl Cocoate, Glycereth-5 Lactate, Triethanolamine, Citric Acid, Propanediol, Isostearamidopropyl Mopholine Lactate, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Disodium EDTA, Di-PPG-2 Myreth-10 Adipate, Diazolidinyl Urea, Iodopropynyl Butylcarbamate

CAUTIONS:

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
