

# KEY ACTIVES GLOSSARY

*This glossary highlights key active ingredients. Refer directly to product packaging for the complete ingredient list for each product.*

## A

**Acetyl Dipeptide-3**-a biomimetic peptide designed to support a clearer, calmer complexion by promoting a balanced skin environment. By helping encourage the skin's natural defensins, key peptides involved in maintaining surface harmony and microbial balance, it works to reduce factors that contribute to visible blemishes. This peptide reinforces skin resilience, clarity, and comfort for smoother-looking results over time.

**Product:** *Clear Peptide*

**Acetyl Glucosamine**- a skin-identical amino sugar and a natural precursor to hyaluronic acid, known for supporting the skin's own moisture production and enhancing surface renewal. By supporting hyaluronic acid synthesis, it improves hydration, elasticity, and overall suppleness. This multitasking ingredient also helps refine texture, even skin tone, and reduce the appearance of hyperpigmentation.

**Product:** *Hyaluronic Peptide, HA Peptide Serum Low, HA Peptide Serum Medium, HA Peptide High*

**Acetyl Hexapeptide-38**- a bioactive signaling peptide that supports communication pathways involved in adipocyte activity and lipid balance within the skin. By promoting harmony between adipose tissue and surrounding structural components, it helps maintain the look of natural volume and contour. This peptide is particularly valued in areas prone to visible volume depletion or hollowing, such as the under-eye, cheek, and perioral regions, where maintaining structural support is essential for a balanced facial appearance. It supports optimal conditions for skin density and resilience, contributing to a smoother, plumper-looking complexion.

**Product:** *Pad Peptide*

**Acetyl Hexapeptide-51 Amide**- a specialized peptide that helps support the skin's natural renewal process by promoting balanced cell activity. It contributes to the appearance of healthier, more resilient skin while helping to reduce visible signs of stress or fatigue. This ingredient also supports overall skin vitality, leaving the complexion looking smoother, calmer, and more refreshed.

**Product:** *Repair Peptide*

**Acetyl Octapeptide-3**- a neuropeptide known for its ability to reduce the appearance of expression lines and dynamic wrinkles. It works by mimicking part of the SNAP-25 protein involved in muscle

contraction, helping to manage the visible signs of overexpression. This results in relaxed facial tension, especially in areas prone to repeated movements such as the forehead, eyes, and mouth.

**Product:** *Tone Peptide*

**Acetyl Pentapeptide-1-** a signaling peptide that mimics the structure of fibroblast growth factor (FGF), Growth factors can stimulate the synthesis of collagen, elastin, and glycosaminoglycans (GAGs), critical components of the extracellular matrix responsible for maintaining skin firmness, elasticity, and optimal hydration. Through this biomimetic action, it strengthens dermal architecture, refine surface texture, and diminish the appearance of fine lines, contributing to smoother, more resilient, and youthful looking skin.

**Product:** *Elastin Peptide*

**Acetyl Tetrapeptide-2-** a skin firming peptide known for its ability to support elasticity, improve resilience, and help counteract the visible effects of aging. It works by stimulating the production of key structural proteins such as elastin and filaggrin, which are essential for maintaining skin firmness and barrier integrity. This peptide also helps improve skin density and tightness, making it especially beneficial for sagging, thinning, or mature skin.

**Product:** *Elastin Peptide*

**Acetyl Tetrapeptide-5-** a moisture-boosting peptide that supports skin elasticity and comfort. It functions by helping regulate water balance and osmotic pressure within the skin, which enhances firmness and softens the appearance of fine lines. By supporting fluid equilibrium, it contributes to a smoother, well-rested look around the eyes.

**Product:** *Pepti-Eye Peptide*

**Allantoin-** a well-known skin conditioning agent that helps soothe and calm sensitive or stressed skin. It promotes a smoother appearance by supporting gentle surface renewal and by helping the skin retain hydration. Allantoin also supports skin softness and comfort, making it especially beneficial for dry or compromised skin. Its gentle nature allows it to be used in a wide range of skin types, promoting a calm, balanced, and refreshed look.

**Product:** *Night Moisturizer, Rejuvenator Peptide*

**Aloe Barbadosis Leaf Juice (Organic)-** a soothing, plant-based ingredient known for its ability to comfort and hydrate the skin. It helps replenish moisture, leaving the skin feeling soft, calm, and refreshed. Aloe also increases the availability of oxygen to the skin, which enhances hydration and promotes a healthier, more radiant appearance. Additionally, it supports the skin's natural balance and improves the overall look of smoothness and clarity, making it ideal for sensitive or stressed skin.

**Product:** *Balancing Cleanser, Collagen Gel, Day Moisturizer*

**Azelaic Acid**- a naturally derived ingredient known for its ability to improve the look of uneven tone and texture. It helps promote clarity by refining the appearance of discolored areas and supporting a more even skin surface. Azelaic Acid also helps maintain a calm and balanced look, making it beneficial for skin that appears dull or uneven.

**Product:** *Correct hp Peptide*

## B

**Bacillus Ferment**- a probiotic-derived ingredient that helps support a balanced and healthy skin microbiome. It promotes the presence of beneficial microflora, which play a key role in maintaining clear and calm skin. By helping to regulate the skin's surface environment, Bacillus Ferment contributes to improved texture, reduced visible redness, and a more refined, even-looking complexion.

**Product:** *Clear Peptide*

**Bio Cellulose**- a natural fiber derived from fermented plant material, known for its exceptional ability to retain moisture and adhere closely to the skin. Its fine, gel like texture allows it to form a breathable second skin layer that enhances the delivery of active ingredients. This material supports deeper penetration of nutrients, provides a cooling and soothing effect, and helps the skin feel refreshed and well hydrated after use.

**Product:** *Pepti-Nano Mask*

**Biotinoyl Tripeptide-1**- a peptide that helps condition and strengthen the hair at the root, supporting the appearance of fuller and healthier-looking lashes and brows. It combines biotin with a tripeptide sequence that interacts with dermal papilla cells to help support cellular metabolism and structural signaling. It is associated with maintaining the anchoring proteins that link the follicle bulb to surrounding tissue and with promoting balanced nutrient exchange within the follicular environment.

**Product:** *Pepti-Lash XL*

**Boswellia Carterii Gum Oil**- extracted from the resin of the frankincense tree, Boswellia Carterii Gum Oil is deeply soothing and nurturing to the skin. It contains aromatic compounds and terpenes that help calm visible redness and replenish the skin's surface. Its conditioning properties support smoother texture and help relieve the look of dry, rough, or environmentally stressed skin.

**Product:** *VIOpure Nourishing Moisturizer*

## C

**Carrot Root Extract-** rich in beta carotene, vitamins A, C, and E, and essential fatty acids that nourish and revitalize the delicate eye area. It supports skin elasticity and helps improve the appearance of fine lines and wrinkles by enhancing hydration and protecting against environmental stressors. Its antioxidant content helps maintain a balanced and refreshed complexion while promoting a smoother, more luminous under-eye appearance.

**Product:** *VIOpure HydraFirm Eye Cream*

**Citric Acid-** a naturally derived ingredient that plays an important role in maintaining the pH balance of the skin. This regulation supports overall skin comfort and promotes a healthy skin environment by preserving the skin's protective barrier. In addition to helping balance the formula, Citric Acid also contributes to a smoother and more refreshed skin texture by enhancing the overall feel and performance of the cleanser.

**Product:** *Balancing Cleanser*

**Coconut & Olive Esters-** helps condition and smooth the skin while gently cleansing. These plant-based esters support moisture retention and help correct the balance of oil and water in the skin, promoting a healthy and comfortable feel. They also enhance the cleanser's creamy like texture, making it gentle and nourishing for all skin types. The result is skin that feels soft, refreshed, and balanced after every use.

**Product:** *Balancing Cleanser, Purifying Cleanser*

**Corylus Avellana Extract (Hazel Nut)-** derived from the hazel plant, offers superior moisturizing properties that help nourish and soften the skin while supporting long lasting hydration. Rich in natural fatty acids and antioxidants, it helps protect the skin from environmental stress and maintain a smooth, healthy appearance. This botanical extract supports the skin's natural barrier by locking in moisture and promoting a supple, balanced feel.

**Product:** *Night Moisturizer*

## D

**Dipeptide-2-** helps support healthy skin function by encouraging balanced hydration and improving overall tone. This peptide is known to support microcirculation and lymphatic flow beneath the

skin's surface, helping reduce the look of puffiness and dullness while promoting a refreshed, energized appearance.

**Product:** *Pepti-Eye Peptide*

## G

**GABA (Gamma-Aminobutyric Acid)**- a naturally occurring neurotransmitter that helps calm and relax the skin by reducing muscle tension and stress-related micro-contractions. GABA works on the surface to help soften the appearance of fine lines and expression wrinkles, creating a temporary smoothing effect. GABA is especially beneficial in formulations targeting stress-induced aging or tension-prone areas, such as the forehead and eyes.

**Product:** *Tone Peptide*

**Gentiana Lutea Root Extract**- an epigenetic modulator, a botanical extract that helps condition and calm the skin. It supports a more even-looking complexion and promotes a refreshed, revitalized appearance. Its antioxidant properties also help protect the skin against visible signs of environmental damage.

**Product:** *Pepti-Eye Peptide*

**Glycerin**- a powerful humectant that draws moisture into the skin, helping to maintain lasting hydration and a smooth, soft texture. It supports the skin's ability to retain water, promoting a plump and refreshed appearance. Glycerin also helps improve the overall comfort and balance of the skin, making it feel nourished and well-conditioned.

**Product:** *Night Moisturizer*

**Glyceryl Cocoate (Cocoate)**- a gentle, plant-derived emollient that helps soften and smooth the skin while enhancing moisture retention. It provides a silky texture to the formula and helps support the skin's natural barrier by locking in hydration. This ingredient also contributes to a soothing, comfortable feel, making the skin appear more nourished and balanced.

**Products:** *Collagen Gel*

## H

**Heptapeptide-8**- a skin conditioning peptide known for its ability to support skin firmness, elasticity, and overall smoothness. It works by promoting cellular communication and helping to maintain the integrity of the skin's structural proteins, such as collagen and elastin. This peptide helps reduce the appearance of fine lines and wrinkles, improves skin texture, and supports a more lifted, youthful look.

**Product:** *Lift Peptide*

**Hexapeptide-10-** a peptide that supports cell-to-cell adhesion and helps maintain skin cohesion and structural integrity. It is associated with key proteins such as laminin and fibronectin, which contribute to the organization of the extracellular matrix (ECM). By reinforcing these molecular connections, Hexapeptide-10 supports optimal conditions for skin strength, elasticity, and overall structural balance, making it beneficial in formulations designed to maintain the appearance of healthy, well-supported skin.

**Product:** *Lift Peptide*

**Hibiscus Esculentus Fruit Extract-** often referred to as "plant based Botox" for its skin smoothing properties, Hibiscus Esculentus Fruit Extract contains natural peptides and sugars that help condition and visibly firm the skin. It supports moisture retention and improves suppleness while the antioxidants in hibiscus also contribute to a brighter, refreshed complexion by supporting the skin's protective barrier and improving surface texture.

**Product:** *VIOpure Restorative Moisturizer*

## K

**Kigelia Africana Fruit Extract-** derived from the fruit of the African sausage tree, Kigelia Africana is prized for its skin tightening, soothing, and clarifying effects. It contains bioflavonoids, saponins, and phytosterols that support skin firmness and improve elasticity while offering antioxidant protection. Known for its traditional use in skin tonics, this extract helps visibly tone sagging or tired looking skin, enhance suppleness, and restore the look of natural lift and structure.

**Product:** *VIOpure HydraFirm Eye Cream, VIOpure Nourishing Moisturizer*

**Kojyl Carboxy Dipeptide 23-** a peptide-linked form of kojic acid designed for focused delivery to areas associated with visible discoloration. By utilizing a peptide carrier, this ingredient helps enhance kojic acid's affinity for pigment-prone regions of the skin, promoting a more even-looking tone and visibly brighter complexion. This targeted delivery strategy supports clearer surface clarity while maintaining skin comfort and balance. Kojic acid works by chelating, or binding, to copper ions at the active site of the enzyme tyrosinase, which inhibits its activity and helps reduce the formation of melanin in the skin.

**Product:** *Correct hp Peptide*

## L

**Lactic Acid-** a naturally derived, mild alpha hydroxy acid that gently exfoliates the skin by removing dead surface cells and promoting a smoother, more refined texture. It helps improve the appearance of dullness, uneven tone, and roughness while supporting the skin's natural renewal process. Lactic acid also has hydrating properties, helping to attract and retain moisture, which leaves the skin feeling soft, fresh, and balanced.

**Product:** *Lactic 5% + Collagen*

**L-Ascorbic Acid (Vitamin C)-** a powerful antioxidant that helps protect the skin from environmental stressors. It supports a brighter, more even looking complexion and promotes a smoother, more refined skin texture. Its presence in the cleanser helps refresh and energize the skin while contributing to a healthy, radiant appearance.

**Product:** *Lactic 5% + Collage, Purifying Cleanser*

## M

**Myrsitoyl Hexapeptide-16-** a conditioning peptide that supports the natural appearance of thicker and fuller lashes and brows. It works by helping to strengthen the hair at the root and enhance its overall texture and resilience. Also provides support for both dermal papilla and keratinocyte function. Its lipid-modified structure enhances affinity with the follicular environment, helping to maintain hydration balance and matrix cohesion around the root while reinforcing the outer structural layer of the hair.

**Product:** *Pepti-Lash XL*

**Myristoyl Pentapeptide-17-** a peptide designed to enhance the appearance of lashes and brows by supporting the hair's natural strength and condition. It helps improve the look of fullness, length, and thickness by nourishing the hair at the root. Primarily supports keratin expression pathways, encouraging normal communication between keratinocytes in the follicular sheath and the extracellular matrix. This peptide helps maintain the organization and resilience of keratin fibers.

**Product:** *Pepti-Lash XL*

## N

**Niacinamide (Vitamin B3)-** a versatile and powerful form of Vitamin B3 that delivers a range of benefits to the skin. It helps improve uneven skin tone, refine the appearance of pores, and enhance the skin's surface texture. Niacinamide supports a healthy moisture barrier, which helps the skin retain hydration and stay protected against external stressors.

**Product:** *Rejuvenator Peptide*

## O

**Oligopeptide-5-** a skin supporting peptide that helps improve the appearance of damaged or stressed skin by encouraging healthy cell communication. It works to enhance the look of smoothness and hydration while helping to maintain the skin's natural balance. This ingredient also supports overall skin resilience, making it appear more calm, even, and refreshed.

**Product:** *Repair Peptide*

## P

**Palmitoyl Dipeptide-5 Diaminobutyroyl Hydroxythreonine-** a short chain peptide that helps strengthen the connection between skin layers, supporting skin density and reducing the appearance of laxity. It plays a key role in maintaining the cohesion and flexibility of the skin by working with other proteins within the extracellular matrix. This peptide helps reinforce the skin's supportive structure, resulting in firmer, more resilient looking skin with improved elasticity and hydration.

**Product:** *Procol Peptide*

**Palmitoyl Dipeptide 61-** a specialized peptide that supports skin renewal and contributes to a more refined and balanced complexion. It helps maintain the appearance of smoothness and clarity while reinforcing the skin's natural resilience. This peptide is especially helpful in improving the look of uneven pigmentation and promoting a more even tone.

**Product:** *Correct hp Peptide*

**Palmitoyl Heptapeptide-18-** a neuro-calming peptide that helps reduce the appearance of dynamic wrinkles by modulating muscle tensions involved in facial expressions. It works by targeting the skin's communication pathways to soften repetitive movement, leading to a visibly smoother and more relaxed appearance.

**Product:** *Tone Peptide*

**Palmitoyl Hexapeptide-52-** a biomimetic peptide designed to help reduce the appearance of dynamic wrinkles and improve overall skin firmness. It works by targeting the muscle contraction process that contributes to expression lines, helping to relax facial tension and smooth visible signs of aging. This peptide also supports collagen and elastin activity, enhancing skin resilience and elasticity over time.

**Product: *Tone Peptide***

**Palmitoyl sh-Hexapeptide-13**-a bioactive peptide that supports the skin's natural renewal process and helps improve the appearance of texture and tone. It works by encouraging smoother, more refined looking skin while promoting a healthy and balanced complexion. This ingredient also helps enhance the skin's overall vitality, leaving it looking refreshed, supple, and nurtured.

**Product: *HA Peptide Serum Low, HA Peptide Serum Medium, HA Peptide Serum High, Hyaluronic Peptide***

**Palmitoyl Tripeptide-5**- a well researched signal peptide that supports the appearance of collagen rich skin by mimicking natural processes involved in skin firmness and elasticity. It helps reduce the look of roughness and fine lines by encouraging the skin renewal cycle. By supporting the skin's ability to maintain structural proteins, this ingredient helps improve tone, texture, and visible suppleness, giving the skin a more lifted and youthful appearance over time.

**Product: *Procol Peptide***

**Palmitoyl Tripeptide-95 Norleucyl Dipeptide-72 D-Phenylalanine sh-Hexapeptide-15**- a targeted peptide that helps support the skin's natural barrier and promotes a healthier appearance overall. It works to reduce the look of surface discoloration and improve tone by supporting balanced skin function. With regular use, it contributes to a clearer, more radiant complexion.

**Product: *Correct hp Peptide***

**Phellinus Linteus Extract**- a medicinal mushroom known for its high levels of antioxidants, polysaccharides, and skin conditioning compounds. It helps reduce the appearance of redness and environmental stress by supporting the skin's natural defense mechanisms. Its rich beta glucan content promotes lasting hydration and strengthens the moisture barrier, making the skin appear more resilient, even toned, and visibly refreshed.

**Product: *VIOpure HydraFirm Eye Cream, VIOpure Nourishing Moisturizer, VIOpure Restorative Cream***

**Plant Extracts**- provides natural nourishment through a blend of vitamins, antioxidants, and soothing compounds that support overall skin health. These botanical ingredients help calm the appearance of redness, protect against environmental stress, and contribute to a more radiant and even looking complexion. They also help condition and soften the skin, improving both tone and texture.

**Product: *Pepti-Nano Mask***

**Polygonum Cuspidatum Root Extract (Japanese Knotweed)**- a rich natural source of resveratrol, provides powerful antioxidant and anti-inflammatory benefits that help protect the skin from environmental stress and oxidative damage. In skincare, it supports collagen preservation, enhances microcirculation, and helps calm irritation while promoting a more even, radiant complexion.

**Product: *Pepti-Nano Mask***

**Poria Cocos Sclerotium Extract**- an epigenetic modulator, known for its soothing and conditioning properties. It helps support a calm, balanced appearance by reducing the look of stressed or fatigued skin. This ingredient is especially beneficial in supporting skin clarity and improving overall tone and texture.

**Product: *Pepti-Eye Peptide***

**Pro Clear Peptide**- formulated to support a healthy skin barrier and promote a balanced microbiome by biomimicking natural defense peptides called defensins. This advanced peptide (blend) helps reduce the appearance of blemishes and redness by reinforcing the skin's natural defense mechanisms and creating an environment that discourages the spread of blemish causing bacteria. By supporting the skin's ability to regulate, this peptide complex helps maintain clearer, calmer, and more resilient skin over time.

**Product: *Clear Peptide***

**Pro Correct hp Peptide** - designed to support a more even and balanced-looking skin tone. This advanced peptide utilizes biomimetic design inspired by natural MSH-related communication pathways to encourage a more refined and radiant complexion. By supporting healthy skin harmony and helping reduce the look of visible discoloration, it promotes a smoother, clearer-appearing, and more uniform tone over time.

**Product: *Correct hp Peptide***

**Pro Elastin Peptide**- a restorative complex formulated with key amino acids combined with skin rejuvenating vitamins. This peptide blend supports the skin's natural ability to restore elastin, helping to improve elasticity, firmness, and flexibility. The amino acids provide essential building blocks for structural proteins, while the added vitamins support skin regeneration, hydration, and resilience.

**Product: *Elastin Peptide***

**Pro Eye Peptide** supports overall skin vitality by promoting healthy communication between skin cells. It helps improve the appearance of fine lines, tone, and elasticity while supporting hydration and a smoother skin texture. The blend works to maintain a balanced, firm, and refreshed complexion over time.

**Product: *Pepti-Eye Peptide***

**Pro Hyaluronan Peptide-** a specialized peptide that helps support the skin's natural ability to maintain hydration and improve moisture balance. It works in harmony with hyaluronic acid to enhance the skin's plump, smooth appearance and promote a healthy, refreshed look. This ingredient also helps reinforce the skin's protective barrier, making it feel more resilient, nourished, and comfortable.

**Product: *HA Peptide Serum Low, HA Peptide Serum Medium, HA Peptide Serum High, Hyaluronic Peptide***

**Pro Lift Peptide-** designed to target cell to cell communication, desmosomes and adherens junctions. This powerful peptide helps improve skin firmness, elasticity, and structural integrity while promoting tissue repair, remodeling, and also improves hydration, barrier health, and overall skin resilience.

**Product: *Lift Peptide***

**Pro Pad Peptide-** designed to support balanced fat pad function, this peptide complex helps maintain the appearance of natural fullness and density in the skin. By promoting harmony between adipose cells and surrounding structural elements, it reinforces the skin's supportive framework and helps preserve a smooth, supple, and resilient complexion.

**Product: *Pad Peptide***

**Pro Procol Peptide-** an advanced blend of targeted peptides designed to support the skin's natural structural network. It helps improve the appearance of skin firmness and density by encouraging fibroblast communication and collagen organization within the extracellular matrix. By promoting a healthier environment for collagen and elastin development, this peptide blend enhances skin smoothness, elasticity, and overall tone.

**Product: *Procol Peptide***

**Pro Repair Peptide-** designed to support the skin's natural renewal and recovery process. This advanced peptide complex helps improve the appearance of stressed or compromised skin by promoting smoother texture, enhanced hydration, and a more balanced complexion. It strengthens the skin barrier, reduces visible signs of irritation, and supports optimal skin function by encouraging healthy cellular communication for a calm, resilient, and visibly restored appearance.

**Product: *Repair Peptide***

**Pro Rejuvenator Peptide-**s a concentrated complex of advanced peptides designed to support optimal skin performance. This blend works by targeting mitochondrial communication and creating a balanced environment for healthy skin renewal. It helps improve the appearance of aging by supporting smoother texture, improved tone, and greater skin resiliency. Peptides also assist in supporting energy balance within the skin cells, helping them function more efficiently.

**Product:** *Rejuvenator Peptide*

**Pro Tone Peptide-** a specialized ingredient designed to target the appearance of dynamic wrinkles and support firmer, more toned skin. By targeting acetylcholine signaling involved in facial muscle contractions, it helps reduce visible tension in the skin. Tone Peptide is particularly effective in areas prone to deep movement lines, such as the forehead, around the eyes, and mouth, helping to smooth and relax the skin's surface.

**Product:** *Tone Peptide*

## Q

**Quercus Robur Extract (French Oak)-** derived from the oak tree, is a botanical antioxidant rich in minerals and coenzymes that help support the overall health and vitality of the skin. It offers protective benefits by helping to neutralize the effects of environmental stress and oxidative damage, which can contribute to dullness and fatigue. The natural compounds found in this extract help promote a balanced, revitalized appearance while supporting the skin's resilience and tone.

**Product:** *Night Moisturizer*

## R

**Retinyl Acetate (Vitamin A)-** a skin conditioning ingredient that helps improve texture and promote a smoother, more refined appearance. It supports the skin's natural renewal process and helps maintain a balanced, healthy looking complexion. This ingredient also contributes to a vibrant, refreshed look by enhancing the overall feel and tone of the skin.

**Product:** *Day Moisturizer*

## S

**Schizophyllan-** a naturally derived polysaccharide extracted from fungi, valued for its ability to help strengthen and protect the skin barrier. It helps support skin hydration by forming a lightweight, breathable film on the skin, reducing moisture loss while improving texture and softness. Schizophyllan also supports the skin's resilience to environmental stress and contributes to a more even and calm complexion. It is often used to help boost the skin's overall clarity and comfort.

**Product: Rejuvenator Peptide**

**sh-Polypeptide-50**- replicates the structure of elastin peptide fragments, which act as structural precursors essential for rebuilding the extracellular matrix. By restoring these key protein networks, sh-Polypeptide-50 helps refine texture, reduce fine lines, and improve firmness and elasticity, promoting smoother, more resilient, and visibly rejuvenated skin.

**Product: Elastin Peptide**

**sh-Polypeptide-121**- helps revitalize and strengthen the skin's structural foundation by supporting collagen renewal and dermal repair. It is a building block of collagen that replicates the structure of collagen peptide fragments, which act as structural precursors essential for rebuilding the extracellular matrix. By restoring these key protein networks, sh-Polypeptide-121 helps refine texture, reduce fine lines, and improve firmness and elasticity, promoting smoother, more resilient, and visibly rejuvenated skin.

**Product: Procol Peptide**

**Sodium Hyaluronate**- a powerful moisture binding ingredient that helps attract and retain water in the skin, promoting long lasting hydration. It supports a soft, smooth, and plump appearance by replenishing the skin's natural moisture levels. This ingredient enhances skin texture and comfort, leaving it feeling supple, balanced, and visibly refreshed.

**Product: Hyaluronic Peptide, Pepti-Nano Mask**

**(Hydrolyzed) Sodium Hyaluronate (< 5 kDa)**- an ultra small form of hyaluronic acid designed to penetrate the upper layers of the skin for deep hydration. Low molecular weight hyaluronic acid helps to improve skin laxity, elasticity and promote a smoother, more refined texture. This form of hyaluronic acid helps maintain long lasting hydration, enhancing the skin's softness, comfort, and overall resilience.

**Product: HA Peptide Serum- Low**

**Sodium Hyaluronate (200-400 kDa)**- penetrates into the upper layers of the epidermis, delivering deep, sustained hydration while forming a lightweight moisture veil on the surface. Its molecular structure allows it to bind and retain water within the extracellular matrix, improving elasticity and biomechanical flexibility. By supporting optimal moisture balance both superficially and within the stratum corneum, it enhances cell cohesion, smoothness, and barrier integrity, promoting a plump, refreshed appearance without heaviness or residue.

**Product: HA Peptide Serum- Medium**

**Sodium Hyaluronate (>1000 kDa)**- a highly effective hydrating ingredient that helps attract and retain moisture on the surface of the skin. Its large molecular size allows it to form a protective, water binding barrier that soothes and softens while reducing the appearance of redness and irritation. This form of hyaluronic acid supports long lasting hydration, enhances skin smoothness, and contributes to a plumper, more radiant complexion.

**Product:** *HA Peptide Serum- High*

**Sodium Lauryl Glucose Carboxylate**- a mild, sulfate free surfactant derived from natural plant sources. It provides a gentle yet effective cleansing action, helping to remove dirt, excess oil, and environmental buildup without disrupting the skin's natural barrier. Unlike harsher cleansing agents, it preserves moisture and leaves the skin feeling soft, balanced, and refreshed. Its low irritation profile makes it suitable for all skin types, and contributes to a smooth, creamy lather that enhances cleansing.

**Product:** *Balancing Cleanser, Purifying Cleanser*

**Sodium Polyglutamate** – a powerful humectant derived from fermented amino acids that holds several times more moisture than hyaluronic acid. It forms a lightweight, breathable film on the skin's surface to lock in hydration, improve smoothness, and enhance the skin's natural radiance and suppleness.

**Product:** *HA Peptide Serum Low, HA Peptide Serum Medium, HA Peptide Serum High, Hyaluronic Peptide*

**Soluble Collagen**- a skin conditioning ingredient that helps support the skin's natural structure and improve its overall texture. Soluble Collagen is a refined form of collagen composed of lower molecular weight peptide fragments designed for enhanced affinity with the skin. These fragments help condition and hydrate the skin, promoting a smoother, more supple appearance. By supporting moisture retention and contributing to the skin's sense of firmness and elasticity, soluble collagen helps maintain a healthier, more resilient complexion.

**Product:** *Collagen Gel, Lactic 5% + Collagen, Pepti-Eye Serum*

**Swertia Chirata Extract**- an Ayurvedic botanical, is prized for its ability to promote visible skin regeneration and rejuvenation. Rich in bioactive compounds like swertiamarin, Swertia Chirata Extract supports natural cellular turnover, which helps improve the look of skin thickness, elasticity, and texture. It is especially helpful in restoring the appearance of thin, fragile, or aging skin.

**Product:** *VIOpure Restorative Moisturizer*

## T

**Tocopheryl Acetate (Vitamin E)**- an antioxidant rich ingredient that helps condition, protect, and deeply hydrate the skin. It supports the skin's ability to retain moisture, helping to prevent dryness and promote long lasting hydration throughout the day. This ingredient also contributes to a smoother, softer texture and helps improve the appearance of rough or stressed skin. By reinforcing the skin's natural barrier, it aids in maintaining a healthy, balanced, and well hydrated complexion.

**Product:** *Day Moisturizer*

**Tocopheryl Linoleate (Vitamin E)**- a blend of vitamin E and linoleic acid that helps condition and soften the skin while supporting moisture retention. It contributes to a smooth, nourished feel and helps improve the appearance of dry or rough skin. As an antioxidant rich ingredient, it also helps protect the skin from the effects of environmental stress, promoting a healthier and more balanced looking complexion.

**Product:** *Day Moisturizer*

**Tripeptide-3**-a bioactive peptide known for its role in supporting the skin's foundational proteins such as collagen and elastin. It helps promote a firmer and more lifted appearance by encouraging the skin's natural structure to remain strong and flexible. With continued use, it contributes to a reduction in the appearance of fine lines and a smoother, more refined skin surface. Tripeptide 3 is particularly effective in improving skin elasticity and enhancing the look of youthful volume.

**Product:** *Rejuvenator Peptide*

## W

**White Tea Extract**- rich in antioxidants that help protect the skin from environmental stressors. It supports a brighter and more even skin tone by helping to calm visible signs of irritation and fatigue. It is especially effective in defending the skin against daily oxidative stress.

**Product:** *Pepti-Eye Peptide*
