

# HYALURONIC PEPTIDE

## DESCRIPTION

Viktoria DeAnn Hyaluronic Peptide offers advanced functional benefits that support hydration, skin renewal, and barrier health. This formula helps restore essential moisture by delivering hydration directly to the skin while also supporting the skin's natural ability to produce hyaluronic acid. The proprietary peptide sequence is formulated support key structural proteins by enhancing the extracellular matrix, helping to maintain firmness and elasticity. It functions as a signaling molecule to encourage cell adhesion and healthy cell activity, renewal and is also a key component to strong structure (collagen and elastin).

### TREATMENT STEP

 Restore

### TEXTURE

Concentrated Serum

### PEPTIDE TYPE

 Signaling

### LAYER LEVEL

Layer 2 (0.8 kDa)

### SKIN TYPE

All Skin Types

### KEY ACTIVES

Pro Hyaluronan Peptide, Sodium Hyaluronate, Palmitoyl sh-Hexapeptide-13, Acetyl Glucosamine, Sodium Polyglutamate

### FUNCTION

- Helps restore essential hydration
- Supports natural production of hyaluronic acid
- Strengthening and improves the Extracellular Matrix (ECM)
- Encourages cell adhesion and mediates proliferation
- Maintains moisture levels within skin layers

### TARGETED SKIN CONCERNS:

- Crepey, dry and dehydrated skin
- Compromised barrier function
- Mature and aging skin
- Sagging, loss of laxity and poor elasticity
- Sun damaged and environmentally stressed skin
- Works to speed recovery for damaged skin
- Rosacea eczema and psoriasis

## THE SCIENCE:

A healthy **extracellular matrix (ECM)** is essential for maintaining optimal skin function and a youthful, vibrant appearance. As the structural support system within the dermis, the ECM provides strength and stability while facilitating communication between skin cells. When functioning properly, it helps keep the skin firm and lifted by supporting collagen and elastin fibers. It also plays a key role in maintaining hydration by holding moisture and distributing nutrients throughout the skin. A strong ECM enhances the skin's natural barrier, protects against environmental stressors, and supports more efficient wound healing and regeneration.

The **extracellular matrix (ECM)** serves as the structural and biochemical scaffold that regulates fibroblast function and skin repair. A well-organized extracellular matrix provides the structural and biochemical framework that allows fibroblasts to migrate efficiently to areas of remodeling or repair. This mobility is guided by gradients within the ECM composed of proteins, glycosaminoglycans, and signaling molecules that act as communication pathways for cell direction. When the ECM is balanced and intact, fibroblasts can more effectively navigate, anchor, and synthesize new matrix components where they are needed most. This dynamic interaction between fibroblasts and their surrounding matrix ensures continuous renewal, supports tissue resilience, and maintains the integrity of the dermal architecture.

### PROFESSIONAL USAGE:

After Cleanse Phase, apply ¼ dropper to dry face, neck and décolleté, avoiding the eye area. Wait 1-2 minutes when using in combination with other Restore Peptides. Apply additional Restore Peptides to dry face, neck and décolleté. Follow with the Protect Phase.

### HOME USAGE:

After cleansing, apply 5-10 drops to dry face and décolleté, avoiding the eye area. Wait 1-2 minutes when using in combination with other Restore Peptides. Apply additional Restore Peptides to dry face, neck and décolleté. Follow with the Protect Phase.

### KEY ACTIVES:

**Pro Hyaluronan Peptide** - a specialized peptide that helps support the skin's natural ability to maintain hydration and improve moisture balance. It works in harmony with hyaluronic acid to enhance the skin's plump, smooth appearance and promote a healthy, refreshed look. This ingredient also helps reinforce the skin's protective barrier, making it feel more resilient, nourished, and comfortable.

**Sodium Hyaluronate** - a powerful moisture binding ingredient that helps attract and retain water in the skin, promoting long lasting hydration. It supports a soft, smooth, and plump appearance by replenishing the skin's natural moisture levels. This ingredient enhances skin texture and comfort, leaving it feeling supple, balanced, and visibly refreshed.

**Palmitoyl sh-Hexapeptide-13** - a bioactive peptide that supports the skin's natural renewal process and helps improve the appearance of texture and tone. It works by encouraging smoother, more refined looking skin while promoting a healthy and balanced complexion. This ingredient also helps enhance the skin's overall vitality, leaving it looking refreshed, supple, and nurtured.

**Acetyl Glucosamine** - a skin-identical amino sugar and a natural precursor to hyaluronic acid, known for supporting the skin's own moisture production and enhancing surface renewal. By supporting hyaluronic acid synthesis, it improves hydration, elasticity, and overall suppleness. This multitasking ingredient also helps refine texture, even skin tone, and reduce the appearance of hyperpigmentation.

**Sodium Polyglutamate** - a powerful humectant derived from fermented amino acids that holds several times more moisture than hyaluronic acid. It forms a lightweight, breathable film on the skin's surface to lock in hydration, improve smoothness, and enhance the skin's natural radiance and suppleness.

### INGREDIENTS:

Aqua (Water), Propanediol, Glycerin, Glutamine, Palmitoyl sh-Hexapeptide-13 Serine SP Amide, Prolyl Hydroxyproline, Glutamic Acid, Acetyl Glucosamine, Sodium Polyglutamate, Lysine, Aspartic Acid, Sodium Hyaluronate, Lactic Acid/Glycolic Acid Copolymer, PEG-40 Stearate, Asparagine, Glycine, Polyvinyl Alcohol, Serine, Xanthan Gum, Diazolidinyl Urea, Valine, Iodopropynyl Butylcarbamate

### CAUTIONS:

**Precautions:** These amino acids are naturally occurring in the body and are generally considered safe, gentle, and non-irritating for most skin types. Most individuals will tolerate this product well. However, those with sensitive, allergy prone, or compromised skin may experience mild irritation or allergic reactions, especially when combined with other active ingredients. As with any skincare product, a patch test is recommended prior to full application to ensure compatibility.

**Warning:** For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
