

RETAIL LIFT KITS

MILD, MEDIUM & ULTRA

DESCRIPTION

Viktoria DeAnn Retail Lift Kits feature a proprietary collection of BioActiv™ Peptides that deliver skin supporting amino acids and nourishing antioxidants to assist in the skin's natural renewal process. These expertly curated kits offer targeted home treatment solutions designed to address visible signs of aging, promote skin tightening and rejuvenation, and support a strong, healthy skin barrier. Each kit includes four clinical strength peptide products formulated to enhance hydration, improve tone, and encourage a more youthful, radiant appearance. Strength of the rejuvenator contained in the kits is dependent on skin health.

Lift Kit Includes: Lift Peptide, 1oz; Tone Peptide, 1oz; Pepti-Eye Serum, 10mL; Rejuvenator, 30mL

Mild: Best for sensitive and compromised barriers

Medium: Best for aging and non-sensitized skin

Ultra: Strongest formula, best for conditioned skin

LAYER LEVEL

Level 1: Lift Peptide (0.5 kDa), Tone Peptide (0.5kDa) **Level 3:** Pepti-Eye Serum (1.0 kDa) **Level 4:** Rejuvenator (any strength)

SKIN TYPE

All Skin Types

KEY ACTIVES

Specific ingredients listed below and on individual product data sheets

FUNCTION

- Improved visually lifted skin, improved tone, texture and overall skin health
- Pure, stable Bioactiv™ peptides support cellular turnover and proper messaging
- Beneficial nutrients (vitamins and co-enzymes), provided by clinical (USP) grade ingredients supports cellular health and peptide efficacy
- Targets skin laxity and sagging while also addressing static and dynamic wrinkles, including concerns along the jawline, décolleté, jowls, neck ("turkey neck"), glabella, and marionette lines

TARGETED SKIN CONCERNS:

- Loss of collagen and elasticity
- Fine lines & dynamic wrinkles
- Loose skin and sagging
- Loss of skin laxity and structure
- Premature aging, aging and mature skin
- Dark Circles, uneven skin tone
- Puffy or baggy under eyes
- General poor skin health
- Sun damaged or environmentally stressed skin

THE SCIENCE:

Signaling peptides function as cellular messengers that help coordinate communication between fibroblasts and keratinocytes, guiding the skin's natural repair and renewal responses. By influencing the activity of structural proteins such as collagen, elastin, and integrins, these peptides help strengthen the network that connects skin cells to the surrounding matrix. This improved cellular communication supports firmer, more cohesive skin architecture, allowing the skin to appear lifted and more resilient as the underlying protein framework is reinforced.

Neurotransmitter inhibiting peptides, also known as neuropeptides, function by modulating communication between nerve cells and muscle fibers at the neuromuscular junction. They work by interfering with the SNARE protein complex, which is responsible for the release of neurotransmitters that trigger muscle contraction. By reducing excessive neuromuscular signaling, these peptides help relax facial tension and minimize the appearance of dynamic wrinkles without disrupting normal muscle function.

PROFESSIONAL RECOMMENDATION:

Recommend appropriate Rejuvenator strength based on skin condition and skin health. Also recommend products in the Cleanse, Exfoliate and Protect phase as part of the home care regime.

HOME USAGE:

Step 1: After using appropriate Cleanse Phase product, apply Lift Peptide serum to dry face, neck and décolleté. Wait 60-90 seconds until completely absorbed.

Step 2: Tone Peptide to face and décolleté. Wait 60-90 seconds until completely absorbed.

Step 3: Apply a small amount of Pepti-Eye Serum, starting from the outside of the eye area and roll serum around entire eye area (below and above). Wait 60-90 seconds until completely absorbed.

Step 4: Apply a thin layer of Rejuvenator to the face, neck and décolleté. Wait 60-90 seconds until completely absorbed then use appropriate Protect Phase product.

KEY ACTIVES:

Lift Peptide: Pro Lift Peptide, Heptapeptide-8, Hexapeptide-10

Tone Peptide: Pro Tone Peptide, Palmitoyl Heptapeptide-18, Palmitoyl Hexapeptide-52

Pepti-Eye Serum: Pro Eye Peptide, Depeptide-2, Tetrapeptide-5

Rejuvenator: Rejuvenator Peptide, Tripeptide-3, Niacinamide

INGREDIENTS:

Specific ingredients listed on individual product data sheets.

CAUTIONS:

Precautions: These amino acids are naturally occurring in the body and are generally considered safe, gentle, and non-irritating for most skin types. Most individuals will tolerate this product well. However, those with sensitive, allergy prone, or compromised skin may experience mild irritation or allergic reactions, especially when combined with other active ingredients. As with any skincare product, a patch test is recommended prior to full application to ensure compatibility.

Precaution: For external use only. Some users of this product may experience a slight tingling due to the active ingredient niacinamide, which should diminish with continued use. If tingling becomes severe, stop use and consult a physician.

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
