

VIOPURE NOURISHING MOISTURIZER

DESCRIPTION

Viktorija DeAnn VIOpure Nourishing Moisturizer is a lightweight yet powerful formula designed to deliver deep hydration and visible revitalization. Infused with precisely extracted mushroom-derived Myco-Actives, it targets multiple skin concerns by supporting barrier integrity, calming redness, and protecting against environmental stressors. This moisturizer helps prevent transepidermal water loss (TEWL), enhance moisture retention, and promote a smoother, brighter, and more even complexion. Its non-sticky texture absorbs effortlessly while leaving the skin balanced.

KEY ACTIVES

Phellinus Linteus Extract, Kigelia Africana Fruit Extract, Boswellia Carterii Gum Oil

FUNCTION

- Nourishing, soothing and hydrating skin protection
- Soothes and protects skin from environmental stressors
- Helps to improve skin firmness
- Assists in brightening skin tone
- Diminishes the appearance of dark spots and hyperpigmentation
- Reduces the appearance of fine lines and wrinkles
- Semi-occlusive light weight formulation

TARGETED SKIN CONCERNS:

- Dry and dehydrated
- Dull and lack luster looking skin
- Uneven texture and tone
- Fine lines and wrinkles
- Compromised barrier function
- Sensitive and sensitized skin

THE SCIENCE:

Phellinus Linteus, often referred to as the “Sanghuang” mushroom, is recognized in advanced bioactive research for its high concentration of beta-glucans, polyphenols, and adaptogenic compounds that support skin resilience. Through precision extraction, the most beneficial molecular fractions are isolated, those shown in in-vitro models to modulate cellular defense pathways and enhance antioxidant capacity. This refined Myco-Active fraction helps fortify the skin's natural barrier and maintain homeostasis when faced with environmental stress. By promoting balanced hydration and protective signaling, Phellinus Linteus extract contributes to a calmer, stronger, and visibly revitalized appearance of the skin.

PROFESSIONAL USAGE:

Apply 2-3 pumps to face, neck and decollete as needed following the Cleanse and Restore phases of treatment.

HOME USAGE:

Apply 2-3 pumps to face, neck, decollete, and body (morning and evening) after Cleanse and Restore steps of the home care routine.

KEY ACTIVES:

Phellinus Linteus Extract - a medicinal mushroom known for its high levels of antioxidants, polysaccharides, and skin conditioning compounds. It helps reduce the appearance of redness and environmental stress by supporting the skin's natural defense mechanisms. Its rich beta glucan content promotes lasting hydration and strengthens the moisture barrier, making the skin appear more resilient, even toned, and visibly refreshed.

Kigelia Africana Fruit Extract - derived from the fruit of the African sausage tree, Kigelia Africana is prized for its skin tightening, soothing, and clarifying effects. It contains bioflavonoids, saponins, and phytosterols that support skin firmness and improve elasticity while offering antioxidant protection. Known for its traditional use in skin tonics, this extract helps visibly tone sagging or tired looking skin, enhance suppleness, and restore the look of natural lift and structure.

Boswellia Carterii Gum Oil - extracted from the resin of the frankincense tree, Boswellia Carterii Gum Oil is deeply soothing and nurturing to the skin. It contains aromatic compounds and terpenes that help calm visible redness and replenish the skin's surface. Its conditioning properties support smoother texture and help relieve the look of dry, rough, or environmentally stressed skin.

INGREDIENTS:

Water, Glycerin, Butylene Glycol, Glyceryl Stearate, Phellinus Linteus Extract, Betaine, Caprylic/Capric Triglyceride, Kigelia Africana Fruit Extract, Inositol, Arginine, Boswellia Carterii Gum Oil, Cetyl Palmitate, Hydroxyacetophenone, Glycosyl Trehalose, Xanthan Gum, Polysorbate 80, Hydrogenated Starch Hydrolysate, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, PEG-100 Stearate, Phenoxyethanol, Chlorphenesin

CAUTIONS:

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
