

PEPTI-EYE SERUM

DESCRIPTION

Viktorija DeAnn Pepti-Eye Serum is an award winning, targeted treatment designed to revitalize and brighten the delicate skin around the eyes. Viktorija DeAnn Pepti-Eye Serum delivers advanced functional benefits to support the health and appearance of the delicate eye area. The proprietary peptides in the formula message fibroblast activity to support the natural production of collagen and elastin, which contributes to firmer, more resilient skin. These peptides also assist with NAD production, helping to improve cellular energy efficiency and support vital skin functions. By enhancing circulation and promoting lymphatic drainage, the serum helps reduce the appearance of puffiness and under eye discoloration.

TREATMENT STEP

SKIN TYPE

All Skin Types

TEXTURE

Concentrated Serum

LAYER LEVEL

Layer 2 (1.0 kDa)

KEY ACTIVES

Pro Eye Peptide, Dipeptide-2, Acetyl Tetrapeptide-5, Poria Cocos Sclerotium Extract, Gentiana Lutea Root Extract, White Tea Extract

FUNCTION

- Supports fibroblast communication and collagen-elastin network integrity
- Helps maintain optimal microcirculation around the eye area
- Encourages healthy lymphatic flow for a refreshed appearance
- Supports hydration and moisture balance within delicate under-eye skin
- Contributes to the look of smoother, more resilient skin around the eyes

TARGETED SKIN CONCERNS:

- Dark under eye circles
- Crows feet, wrinkles or define lines
- Puffiness or bagginess under the eye
- Loss of elasticity and sagging
- Fine lines and wrinkles around eye
- Dry and dehydrated eyes
- Tired looking eyes

THE SCIENCE:

Lymphatic vessels and microcapillaries located in the periorbital region work together to maintain fluid balance, nutrient exchange, and detoxification beneath the skin's surface. Proper lymphatic drainage supports the removal of excess interstitial fluid and metabolic byproducts, while efficient microcirculation ensures consistent oxygen and nutrient delivery to surrounding tissues. When these systems slow or become congested, puffiness may result from fluid retention, and dark circles can appear due to reduced oxygenation and sluggish capillary flow.

Peptides can influence **biological signaling** associated with these processes, including pathways related to VEGF, a key regulator of capillary health and microvascular communication. By supporting balanced VEGF expression and fluid dynamics, peptides help maintain optimal conditions for circulation, lymphatic efficiency, and skin vitality, contributing to a refreshed and well rested appearance around the eyes.

PROFESSIONAL USAGE:

After the Cleanse Phase, apply one drop to the eye area. Starting on the outside corner of the eye, gently pat into skin moving inward using products under and over the eye. Wait 1-2 minutes when using in combination with other Restore Peptides. Avoid direct eye contact. Apply additional Restore Peptides to face, neck and décolleté. Follow with the Protect Phase.

HOME USAGE:

After Cleanse Phase, prep applicator with ½ pump of product. Gently apply by using roller, start on the outside corner of the eye, moving inward using product under and over the eye. Wait 1-2 minutes when using in combination with other Restore Peptides. Avoid direct eye contact. Apply additional Restore Peptides to face, neck and décolleté. Follow with the Protect Phase.

KEY ACTIVES:

Pro Eye Peptide supports overall skin vitality by promoting healthy communication between skin cells. It helps improve the appearance of fine lines, tone, and elasticity while supporting hydration and a smoother skin texture. The blend works to maintain a balanced, firm, and refreshed complexion over time.

Dipeptide-2 - helps support healthy skin function by encouraging balanced hydration and improving overall tone. This peptide is known to support microcirculation and lymphatic flow beneath the skin's surface, helping reduce the look of puffiness and dullness while promoting a refreshed, energized appearance.

Acetyl Tetrapeptide-5 - a moisture-boosting peptide that supports skin elasticity and comfort. It functions by helping regulate water balance and osmotic pressure within the skin, which enhances firmness and softens the appearance of fine lines. By supporting fluid equilibrium, it contributes to a smoother, well-rested look around the eyes.

Poria Cocos Sclerotium Extract - an epigenetic modulator, known for its soothing and conditioning properties. It helps support a calm, balanced appearance by reducing the look of stressed or fatigued skin. This ingredient is especially beneficial in supporting skin clarity and improving overall tone and texture.

Gentiana Lutea Root Extract - an epigenetic modulator, a botanical extract that helps condition and calm the skin. It supports a more even looking complexion and promotes a refreshed, revitalized appearance. Its antioxidant properties also help protect the skin against visible signs of environmental damage.

White Tea Extract - rich in antioxidants that help protect the skin from environmental stressors. It supports a brighter and more even skin tone by helping to calm visible signs of irritation and fatigue. It is especially effective in defending the skin against daily oxidative stress.

INGREDIENTS:

Aqua (Water), Arginine, Oleth-20, PEG-60 Almond Glycerides, PEG-150 Pentaerythrityl Tetrastearate, Histidine, Glycerin, Asparagine, Proline, Serine, Dipeptide-2, Glycine, Aspartic Acid, Acetyl Tetrapeptide-5, Soluble Collagen, Acetamidopropyl Trimonium Chloride, Pantothenic Acid (B5), Propanediol, Disodium EDTA, Camellia Sinensis (White Tea) Extract, Butylene Glycol, Pyridoxine (B6), Niacinamide (B3), Poria Cocos Sclerotium Extract, Citric Acid, Ethylhexylglycerin, Gentiana Lutea Root Extract, Sodium Benzoate, Caffeine, Phenoxyethanol, Diazolidinyl Urea, Fragrance, Iodopropynyl Butylcarbamate

CAUTIONS:

Precautions: These amino acids are naturally occurring in the body and are generally considered safe, gentle, and non-irritating for most skin types. Most individuals will tolerate this product well. However, those with sensitive, allergy prone, or compromised skin may experience mild irritation or allergic reactions, especially when combined with other active ingredients. As with any skincare product, a patch test is recommended prior to full application to ensure compatibility.

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
