

PEPTI-LASH XL

DESCRIPTION

Viktoria DeAnn Pepti-Lash-XL is a targeted lash and brow serum formulated with a proprietary complex of peptides to support the natural growth cycle of hair for a visibly fuller, longer, and thicker appearance. This lightweight, conditioning formula contains no harsh chemicals that helps nourish and strengthen the hair's natural structure, enhancing the look of lash and brow density over time. Designed for consistent use, Pepti-Lash-XL promotes healthier, more voluminous lashes and brows, with visible results typically seen in four to six weeks and optimal improvement within three months.

KEY ACTIVES

Biotinoyl Tripeptide-1, Myristoyl
Pentapeptide-17, Myrsitoyl Hexapeptide-16

FUNCTION

- Creates healthy hair growth cycles
- Increase follicle health
- Supports optimal growth environment
- Conditions hair follicle and root health
- Non-hormone based, less irritations
- Can be used with other skincare products, make up and mascara
- May be used on lash extensions

TARGETED SKIN CONCERNS:

- Damaged lashes
- Weak or broken lashes
- Sparse or thin lashes
- Thin or damaged eyebrows
- Damage due to lash extensions

THE SCIENCE:

Dermal papilla cell activation through peptides involves precise biochemical signaling that influences the hair follicle's regenerative cycle and structure. Dermal papilla cells, a type of stem cell, located at the base of the follicle, are specialized mesenchymal cells responsible for regulating the anagen (growth) phase, stimulating matrix keratinocyte proliferation, and directing extracellular matrix remodeling. When bioactive peptides bind to cell-surface receptors on these papilla cells, they trigger intracellular cascades that increase growth factors, collagen, and keratin-associated proteins. This activation enhances cellular metabolism, mitochondrial function, and ATP synthesis, promoting both follicular renewal and structural reinforcement. By mimicking the skin's natural communication molecules, these peptides essentially reawaken dormant papilla activity, supporting sustained hair fiber production, improved follicle anchoring, and the visible thickening and strengthening of lashes or hair over time.

HOME USAGE:

Remove all makeup from the eyelashes and brows. For eyelashes, use the brush applicator to apply to the base of the upper and lower eyelashes, starting from the inner corner of the lashes and working to the outer edge. For eyebrows, apply one pass using the brush applicator from the inner brow to the outside edge. Avoid contact with the eye.

KEY ACTIVES:

Biotinoyl Tripeptide-1 - a peptide that helps condition and strengthen the hair at the root, supporting the appearance of fuller and healthier looking lashes and brows. It combines biotin with a tripeptide sequence that interacts with dermal papilla cells to help support cellular metabolism and structural signaling. It is associated with maintaining the anchoring proteins that link the follicle bulb to surrounding tissue and with promoting balanced nutrient exchange within the follicular environment.

Myristoyl Pentapeptide-17 - a peptide designed to enhance the appearance of lashes and brows by supporting the hair's natural strength and condition. It helps improve the look of fullness, length, and thickness by nourishing the hair at the root. Primarily supports keratin expression pathways, encouraging normal communication between keratinocytes in the follicular sheath and the extracellular matrix. This peptide helps maintain the organization and resilience of keratin fibers.

Myristoyl Hexapeptide-16 - a conditioning peptide that supports the natural appearance of thicker and fuller lashes and brows. It works by helping to strengthen the hair at the root and enhance its overall texture and resilience. Also provides support for both dermal papilla and keratinocyte function. Its lipid-modified structure enhances affinity with the follicular environment, helping to maintain hydration balance and matrix cohesion around the root while reinforcing the outer structural layer of the hair.

INGREDIENTS:

Aqua (Water), Glycerin, Aspartic Acid, Arginine, Carnitine, Biotinoyl Tripeptide-1, Taurine, Glycine, Phenylalanine, Myristoyl Pentapeptide-17, Lysine, Proline, Myristoyl Hexapeptide-16, Leucine, Histidine, Tryptophan, Serine, Pantothenic Acid (B5), Caffeine, Niacinamide (B3), Diazolidinyl Urea, Pyridoxine (B6), Iodopropynyl Butylcarbamate, PEG-40 Stearate, Propanediol, Xanthan Gum, Valine

CAUTIONS:

Precautions: These amino acids are naturally occurring in the body and are generally considered safe, gentle, and non-irritating for most skin types. Most individuals will tolerate this product well. However, those with sensitive, allergy prone, or compromised skin may experience mild irritation or allergic reactions, especially when combined with other active ingredients. As with any skincare product, a patch test is recommended prior to full application to ensure compatibility.

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
