

# PEPTI-NANO MASK

## DESCRIPTION

The Viktorija DeAnn Pepti-Nano Mask delivers advanced functional benefits through its use of nano needling technology, gradient pressure, and naturally grown fibrils. The mask's nano structured bio-cellulose material closely adheres to the skin, creating a second skin effect that allows for precise and enhanced delivery of active ingredients. Made from bio-compatible, clinical grade materials, the mask is designed to calm, restore, and visibly refresh the skin while reinforcing barrier function and increasing the effectiveness of professional treatments.

### TREATMENT STEP

 Restore

### PEPTIDE TYPE

N/A

### SKIN TYPE

All Skin Types, especially dry & dehydrated

### TEXTURE

Gel Sheet Mask

### LAYER LEVEL

N/A

### KEY ACTIVES

Bio Cellulose, Sodium Hyaluronate, Polygonum Cuspidatum Root Extract, Other Plant Extracts

### FUNCTION

- Significantly increases hydration
- Improves other restore peptide penetration
- Increases product absorption
- Reduces the appearance of pore size
- Reduces appearance of fine lines and wrinkles
- Visibly diminishes the signs of aging

### TARGETED SKIN CONCERNS:

- Dull, dry & dehydrated
- Aging or mature skin
- Loss of elasticity and skin tension
- Fine lines and dynamic wrinkles
- Sensitive and reactive skin
- Compromised barrier function
- Post treatment hydration and calming

## THE SCIENCE:

**Nano fibril delivery system:** The ultra fine fibers, just 2-50 nanometers wide, create a dense mesh that intimately conforms to every contour of the skin. Acting like countless tiny needles, these nano fibrils settle into fine lines, grooves, and wrinkles to deliver active ingredients directly to targeted areas. This precision allows for enhanced absorption and effective delivery, ensuring that actives reach the skin cells where they can have the greatest impact. By mimicking nano needling, the mask maximizes ingredient penetration without mechanical irritation, making it ideal for advanced professional treatments.

**Electrical gradient infusion:** As the bio-cellulose grows, it naturally forms a gradient from the thicker layer near the bacterial source to the thinner outer surface. This gradient is not only structural but generates a subtle electrical field across the mask. The field gently encourages active ingredients to move deeper into the skin by leveraging this natural difference in density, enhancing absorption and supporting the skin's bioelectric communication processes.

### PROFESSIONAL USAGE:

Use Mask after Cleanse Phase and application of recommended Restore Peptides. The mask is made up of three layers. Unfold mask and remove from sleeve. Remove the protective plastic layer of mask and discard. Carefully apply the nanocellulose layer (non-fabric layer) to the face. Press firmly onto the face and carefully remove the top fabric layer. Adjust for facial contour and remove the treatment mask after 20-40 minutes. Follow with protect phase.

### HOME USAGE:

Use Mask after Cleanse Phase and application of recommended Restore Peptides. The mask is made up of three layers. Unfold mask and remove from sleeve. Remove the protective plastic layer of mask and discard. Carefully apply the nanocellulose layer (non-fabric layer) to the face. Press firmly onto the face and carefully remove the top fabric layer. Adjust for facial contour and remove the treatment mask after 20-40 minutes. Follow with protect phase.

### KEY ACTIVES:

**Bio Cellulose** - a natural fiber derived from fermented plant material, known for its exceptional ability to retain moisture and adhere closely to the skin. Its fine, gel like texture allows it to form a breathable second skin layer that enhances the delivery of active ingredients. This material supports deeper penetration of nutrients, provides a cooling and soothing effect, and helps the skin feel refreshed and well hydrated after use.

**Sodium Hyaluronate** - a powerful moisture binding ingredient that helps attract and retain water in the skin, promoting long lasting hydration. It supports a soft, smooth, and plump appearance by replenishing the skin's natural moisture levels. This ingredient enhances skin texture and comfort, leaving it feeling supple, balanced, and visibly refreshed.

**Polygonum Cuspidatum Root Extract (Japanese Knotweed)** - a rich natural source of resveratrol, provides powerful antioxidant and anti-inflammatory benefits that help protect the skin from environmental stress and oxidative damage. In skincare, it supports collagen preservation, enhances microcirculation, and helps calm irritation while promoting a more even, radiant complexion.

**Other Plant Extracts** - provides natural nourishment through a blend of vitamins, antioxidants, and soothing compounds that support overall skin health. These botanical ingredients help calm the appearance of redness, protect against environmental stress, and contribute to a more radiant and even looking complexion. They also help condition and soften the skin, improving both tone and texture.

### INGREDIENTS:

Water, Glycerin, Butylene Glycol, Sodium Hyaluronate, Sodium Polyglutamate, Aloe Barbadensis Leaf Extract, Polysorbate 20, Sodium Lactate, Sodium PCA, Sodium Citrate, Centella Asiatica Extract, Rosa Damascena Flower Oil, Rosa Damascena Flower Water, Polygonum Cuspidatum Root Extract, Scutellaria Baicalensis Root Extract, Citric Acid, Phenoxyethanol, Camellia Sinensis Leaf Extract, Glycyrrhiza Glabra (Licorice) Root Extract, Chamomilla Recutita (Matricaria) Flower Extract, Rosmarinus Officinalis (Rosemary) Leaf Extract

### CAUTIONS:

**Warning:** For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.
