

REJUVENATOR SERIES

MILD, MEDIUM & ULTRA

DESCRIPTION

Viktoria DeAnn Rejuvenator Series is a progressive, three level system formulated to support healthy skin renewal and improve the visible signs of aging. At the core of this series is the advanced Rejuvenator peptide, which supports an ideal environment for optimal rejuvenation by promoting balanced cell turnover and strengthening the skin's overall function. Available in three strengths to match varying levels of skin health and tolerance, Rejuvenator is designed to gradually build skin resilience and radiance. Each formula combines powerful peptides, niacinamide, and antioxidants to support a smoother, brighter complexion while helping to refine texture and tone.

Mild: Best for sensitive and compromised barriers

Medium: Best for aging and non-sensitized skin

Ultra: Strongest formula, best for conditioned skin

TREATMENT STEP

Restore

TEXTURE

Concentrated Serum

PEPTIDE TYPE

Signaling

LAYER LEVEL

Layer 4

SKIN TYPE

All Skin Types (level based on skin health)

KEY ACTIVES

Pro Rejuvenator Peptide, Tripeptide 3, Schizophyllan, Allantoin, Niacinimide

FUNCTION

- Messages mitochondria (energy production)
- Supports natural desquamation and proliferation
- Encourages optimal cell communication and renewal
- Assists in ATP (energy source) synthesis pathways
- Fibroblast activity provide newer and younger cells

TARGETED SKIN CONCERNS:

- Structural integrity and loss
- Thick stratum corneum (glycation)
- Slow cell turnover & poor cell function
- Keratinocyte build up or cell accumulation
- Dull and uneven texture
- Damaged or compromised barrier
- Visible signs of aging and mature skin
- Sun damaged skin or hyperpigmentation

THE SCIENCE:

ATP (Adenosine Triphosphate) and the **mitochondria**, the powerhouse of the cell, play a vital role in maintaining healthy, vibrant skin. ATP is the primary source of energy used by cells to perform essential functions, including repair, regeneration, and communication. In the skin, this energy is crucial for supporting processes like collagen and elastin production, cellular turnover, hydration balance, and the maintenance of the skin barrier. Mitochondria are responsible for producing ATP. When mitochondrial function declines the skin's energy supply decreases. This can lead to slower cell turnover, dullness, weakened barrier function, and visible signs of aging such as fine lines, uneven texture, and loss of firmness.

Nicotinamide (NADH) acts as a **precursor to NAD⁺**, the active coenzyme essential for cellular energy metabolism. Within the skin, NADH is oxidized to NAD⁺, enabling participation in mitochondrial respiration and ATP synthesis. This process fuels cellular repair and regeneration, supporting optimal metabolic activity, improved resilience, and enhanced vitality in aging or environmentally stressed skin cells.

PROFESSIONAL USAGE:

After Cleanse Phase and other Restore Peptide application, apply a thin layer to dry face, neck and décolleté, avoiding the eye area. Allow products to be fully absorbed then follow with the Protect Phase.

HOME USAGE:

After cleansing, and other Restore Peptide application, apply a thin layer to dry face, neck, and décolleté avoiding the eye area. Allow the product to penetrate completely and follow with the Protect Phase.

KEY ACTIVES:

Pro Rejuvenator Peptide - a concentrated complex of advanced peptides designed to support optimal skin performance. This blend works by targeting mitochondrial communication and creating a balanced environment for healthy skin renewal. It helps improve the appearance of aging by supporting smoother texture, improved tone, and greater skin resiliency. Peptides also assist in supporting energy balance within the skin cells, helping them function more efficiently.

Tripeptide-3 - a bioactive peptide known for its role in supporting the skin's foundational proteins such as collagen and elastin. It helps promote a firmer and more lifted appearance by encouraging the skin's natural structure to remain strong and flexible. With continued use, it contributes to a reduction in the appearance of fine lines and a smoother, more refined skin surface. Tripeptide 3 is particularly effective in improving skin elasticity and enhancing the look of youthful volume.

Schizophyllan - a naturally derived polysaccharide extracted from fungi, valued for its ability to help strengthen and protect the skin barrier. It helps support skin hydration by forming a lightweight, breathable film on the skin, reducing moisture loss while improving texture and softness. Schizophyllan also supports the skin's resilience to environmental stress and contributes to a more even and calm complexion. It is often used to help boost the skin's overall clarity and comfort.

Allantoin - a well known skin conditioning agent that helps soothe and calm sensitive or stressed skin. It promotes a smoother appearance by supporting gentle surface renewal and by helping the skin retain hydration. Allantoin also supports skin softness and comfort, making it especially beneficial for dry or compromised skin. Its gentle nature allows it to be used in a wide range of skin types, promoting a calm, balanced, and refreshed look.

Niacinamide (Vitamin B3) - a versatile and powerful form of Vitamin B3 that delivers a range of benefits to the skin. It helps improve uneven skin tone, refine the appearance of pores, and enhance the skin's surface texture. Niacinamide supports a healthy moisture barrier, which helps the skin retain hydration and stay protected against external stressors.

INGREDIENTS:

Mild: Aqua (Water), Pantothenic Acid (vitamin B5), Cocos Nucifera (Coconut) Oil, Stearic Acid, Butylene Glycol, Glyceryl Stearate, Cetyl Alcohol, Tripeptide-3, Hydrogenated Phosphatidylcholine, Arginine, Glycine, Glycerin, Leucine, Lysine, Histidine, Threonine, Tyrosine, Tryptophan, Valine, Glycol Stearate, Niacinamide (vitamin B3), Niacin, PEG-100 Stearate, Stearamide AMP, Propanediol, Pyridoxine HCl (vitamin B6), Allantoin, Diazolidinyl Urea, Schizophyllan, Tocopheryl Acetate (vitamin E), Iodopropynyl Butylcarbamate

Medium and Ultra contain the same ingredients in different concentrations. Please refer to the product label for specific ingredient order.

CAUTIONS:

Precautions: These amino acids are naturally occurring in the body and are generally considered safe, gentle, and non-irritating for most skin types. Most individuals will tolerate this product well. However, those with sensitive, allergy prone, or compromised skin may experience mild irritation or allergic reactions, especially when combined with other active ingredients. As with any skincare product, a patch test is recommended prior to full application to ensure compatibility.

Warning: For external use only. Avoid direct contact with the eye. In the event of direct eye contact, rinse with cool water. Irritation, itching sensation and/or eye redness may occur. If irritation, inflammation or swelling occurs, discontinue product usage. If irritation persists or becomes severe, stop use and consult a physician. Keep out of reach of children.

Precaution: For external use only. Some users of this product may experience a slight tingling due to the active ingredient niacinamide, which should diminish with continued use. If tingling becomes severe, stop use and consult a physician.
