

ACNE, BREAKOUTS, SCARRING, PIE, PIH

Viktoria DeAnn's clarifying peptide formulations are designed to address acne, breakouts, scarring, and post-inflammatory pigmentation (PIE and PIH) by promoting balance and renewal within the skin. These targeted peptides help calm inflammation, reduce congestion, and support the skin's natural healing processes to minimize visible blemishes and discoloration. Over time, they work to refine texture, restore clarity, and promote a smoother, more even-toned complexion with improved resilience and radiance.

COMMON SYMPTOMS

- Clogged pores, blackheads and whiteheads (grade 1 & 2)
- Congestion, bumps, and uneven texture
- Inflamed papules or pustules (red, swollen bumps or pimples)
- Cystic lesions (grade 3 & 4)
- Excess oil production
- Post inflammatory hyperpigmentation (PIH)
- Post inflammatory erythema (PIE)
- Redness and irritation
- Uneven texture
- Scarring from recurring breakouts
- Unbalanced microbiome
