

VIKTORIA DÉANN

PEPTIDE COSMECEUTICALS

Creating Your Peptide Science Pro Manual

Viktoria DeAnn Education Experience...

The Peptide Science Pro Manual is designed as a customizable, professional resource that supports estheticians in building confidence, deepening knowledge, and creating success with the Viktoria DeAnn product line.

This manual is not just a collection of documents, it is a personalized educational tool that grows with each esthetician's business, treatment room strategy, and level of expertise.

Through this process, estheticians are invited to build, organize, and curate their own Peptide Science reference system, creating a valuable resource they can use daily in both education and client care.

The Peptide Science Pro Manual is intended to become a living document, one that continues to grow alongside the esthetician's education, experience, and business development. Documents will be added and updated as necessary.

By building this manual, estheticians are not only organizing information, but also strengthening their understanding of peptide science, improving treatment outcomes, and elevating their professional practice with Viktoria DeAnn.

Materials Needed

To create the Peptide Science Pro Manual, the following supplies are recommended:

- **2-inch binder**
 - **10 tab dividers with labels** (handwritten or printed)
 - **Approximately 50 sheet protectors (optional)**
-

Purpose of the Manual

The Peptide Science Pro Manual is designed to be:

- **Informative** – providing access to essential Viktoria DeAnn resources
- **Customizable** – tailored to each esthetician’s business and services
- **Practical** – used as a daily tool in the treatment room and consultation process

Estheticians are encouraged to select only the materials that align with their services, clientele, and business model, allowing the manual to remain focused, relevant, and easy to use.

Getting Started

To begin building the manual:

1. Print and insert the front cover.
2. Print the side label, cut and insert on side of binder.
3. Print the Table of Contents. This should be the first document in the binder.
4. Create tabbed sections based on the Table of Contents.
5. Review available documents and resource locations.
6. Download and print only the materials needed.
7. Organize documents into their corresponding sections.
8. Suggested: Print and organize additional documents used for client education.

Additional documents and resources will continue to be added and updated regularly.

Manual Sections & Resources

1. Company Information (*Located on the Resource Page*)

- Viktoria DeAnn Mission Statement
 - Complementary Backbar Promotion
 - Company Contact Form
 - New Client Roadmap
 - Frequently Asked Questions (FAQ’s)
 - Point System Information (*coming soon*)
-

2. Completed Course Work (*Located within The Academy with the courses.*)

- Product Knowledge Comprehensive Quiz
 - Peptide Science 101 Quiz
 - Product Knowledge Certification
 - Peptide Science 101 Certification
-

3. Class Note Sheets (*Located within The Academy with the courses.*)

- Product Knowledge
 - Peptide Science
 - Business and Treatment Room Focus
-

4. Product Education & Information (*Located on the Resource Page*)

- General Product Guide
 - Layering Guide
 - Peptide Selection Guide
 - Effective Peptide Application
 - Glossary of Key Actives
-

5. Product Data Sheets

(Located on the Resource Page under Product Education & Information)

6. VDA Forms & Documents

(Located on the Resource Page)

- Client Intake Form
 - Continued Consent Form
 - Current Price List
 - Client Photo Release
 - Online Sales Agreement (***Completed online; print and retain for records***)
-

7. The Science

(Located on the Resource Page of website)

- Skin Condition Guides *(Located on the Resource Page of website, own Section)*
 - Monthly Skin and Science Blogs *(Located on the Education Section of website)*
