SKIN CONDITION GUIDE

BRIGHTENING & EVEN SKIN TONE

Viktoria DeAnn's advanced peptide-based formulations are designed to address uneven tone, hyperpigmentation, melasma, and dark spots by supporting the skin's natural renewal processes. These targeted peptides work to balance melanin production and promote a clearer, more radiant complexion. Over time, skin appears brighter, smoother, and more even, with improved clarity and a luminous, healthy glow.

COMMON SYMPTOMS

- Dull or lackluster complexion
- Uneven skin tone or patchy discoloration
- Hyperpigmentation, including dark spots, sun spots
- PIH, PIE, post-inflammatory marks
- Sallow or tired appearance
- Slow cell turnover
- Residual redness
- Continual redness from previous irritation or damage
- Visible photodamage from UV exposure
- Overall loss of clarity and brightness
