SKIN CONDITION GUIDE

DULL & DEHYDRATED SKIN

Viktoria DeAnn's hydrating and revitalizing peptide formulations are crafted to deeply replenish and restore balance to dry, dull, and dehydrated skin. These peptides help decrease transepidermal water loss (TEWL) while increasing the skin's natural moisturizing factors (NMF) to promote lasting hydration and suppleness. Enriched with nourishing actives, they work to strengthen and rebuild the skin barrier, improving elasticity and resilience over time. The result is skin that feels comforted, appears luminous, and maintains optimal moisture for a refreshed, healthy glow.

COMMON SYMPTOMS

- Lack of radiance or a tired appearance
- Rough or uneven texture
- Fine dehydration lines, deep crevices
- Tightness or discomfort
- Flaky or scaly patches
- Increased levels of transepidermal water loss (TEWL)
- Increased sensitivity and reactivity
- Weakened skin barrier function
- Poor product absorption
- Overall loss of suppleness and glow
